

Summer Intern I, Biotechnology

Position Type: Part Time (July – September)

Dept: Research and Development

Location: San Diego

Experience Level: College/University (currently enrolled or recently graduated)

Hours: 10 – 20 per week

Biomatrica Inc. is a dynamic start-up Biostability Company. We provide room temperature storage, transport and organizational solutions for laboratories managing and/or processing biological samples. Biomatrica is seeking a highly motivated intern to join our Research and Development team.

Job Description

As a member of a highly dynamic team, the Intern will assist research and development scientists. Applicant's primary responsibility will be to assist in general lab duties (including: media preparation and general cleaning). The applicant may provide assistance in experimental set-ups or data collection, as need arises. Applicant should effectively communicate work/project status with research scientists. Candidate should demonstrate accountability for independently solving complex problems as appropriate. Please note that this is not a paid position.

Major Duties and Responsibilities:

Research & Development

Isolation of nucleic acids and protein

Media/ Chemical preparation

Maintain lab notebook

Cleaning

Required Skills and Abilities:

Strong attention to detail

Strong work ethic

Fast and self-motivated learner

Able to multi-task and manage multiple priorities

Eager to learn and implement new techniques

Competency in basic software packages (PowerPoint, Excel, Word)

Qualifications:

College/University Student (currently enrolled or recently graduated)
Interest in pursuing an advanced degree in the sciences
Interest in pursuing a career in biotechnology
Laboratory experience in chemistry and/or molecular biology is highly desirable

Please send a cover letter expressing your interest in this position to jobs@biomatrica.com. (A resume would also be helpful). Please send attachments in MS Word format only). No Relocation reimbursement is offered for this position. For immediate consideration please note “Summer Intern I” in the subject line of your email. Candidate must be authorized to work in the United States (US citizenship or permanent resident).
